

LABELLING MACHINE LEWIS 160-20

Electronic and pneumatic digital labelling machine Lewis 160/20.

The machine has been refurbished and completely modified; it is fast, silent, reliable and easy to use: it allows the worker to easily set the numbers of stitches using a 5 position selector.

It can be set according to the different type of fabric and process.

When dealing with ties, it's possible to quickly replace the plate to change from label application to loop application.

When dealing with scarves, there's only a plate and a stopper presser foot in rubber to work with delicate fabrics.

MAIN FEATURES

- 1 High quality tie manufacturing**
- 2 High productivity**
- 3 Easy to use**
- 4 Easy and quick choice of the number of stitches using a selector**
- 5 Easy and quick plate replacement**
- 6 Possibility to set the type of work: round and rectangular for scarves; L-type for ties**
- 7 Certified machine in accordance with the current European legislation**
- 8 High quality electro-mechanical and pneumatic components**

GENERAL DATA	
MACHINE SIZE	105 cm (L), 97 cm (W), 164 cm (H)
TOTAL OCCUPIED AREA	165 cm X 120 cm
MACHINE WEIGHT	90 kg
LINE VOLTAGE	230 Vac 50/60
INSTALLED POWER	0.5 KVA
COMPRESSED AIR PRESSURE	5,5/6 atm
COMPRESSED AIR CONSUMPTION	5 l/min
MAIN COMPONENTS	Sewing machine Lewis; engine and control unit Efk; pneumatic SMC
DECLARATION OF CONFORMITY	2006/42CE DIRECTIVE OF MACHINE CONFORMITY EN 60204-1 MACHINE SECURITY

Machine size

Technical features

The electronic control unit of the labelling machine allows to:

- run the digital engine
- set the sewing sequences
- control the electropneumatic and electromechanical components

1 High quality tie manufacturing

Thanks to many years of experience, all the range of machines manufactured by *Frigerio e Corazza* aim to obtain the highest quality standards requested.

2/3 High productivity and easy use

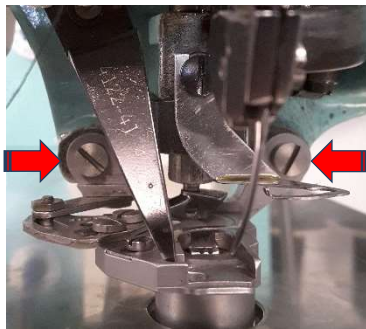

Easy to use thanks to the simple setting of the type of work needed.

4 Choice of the number of stitches

The number of stitches can be decided using the front selector. The handle has got 5 options and it allows to change easily and quickly the number of stitches needed.

5 Plate replacement

According to the type of work requested, the plate can be replaced just using the two front screws. It doesn't need further adjustments.

6 Type of work

At your choice, the machine can be equipped with different types of work table:

Round: original Lewis model

Large and rectangular: for scarves

L-type: for ties

7/8 Certificates and components

The labelling machine has been certified in accordance with the current European law. All the components reflect the high quality and reliability of the machine.
